Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-32 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-32 of prior U.S. Patent No. 6,707,567. This is a double patenting rejection.

For example:

Regarding claim 1, a supervising system (col. 21, line 45) for surprising a plurality of image forming apparatuses, comprising:

a central control apparatus (col. 21, line 46);

a mobile computer selectively connected to one of the plurality of image forming apparatus with a wired or wireless interface, and configured to execute communications

Application/Control Number: 10/767,351

Art Unit: 2625

of the connected image forming apparatus of information with said central control apparatus via a network (col. 21, lines 55-59),

wherein said mobile computer includes (col. 21, line 60):

an operation history information inputting device configured to input operation history request information (col. 21, lines 60-63);

an operation history information informing device configured to inform the operation history request information to the central control apparatus; and wherein said central control apparatus includes (col. 21, lines 64-67):

an operation history information storing device configured to store operation history information related to an operation executed by a service person for each of said plurality of image forming apparatuses, when the operation history information is received from each of the plurality of image forming apparatuses (col. 22, lines 1-7);

a reading device configured to read prescribed operation history information from said operation history information storing device when a request for the operation history information is received from said mobile computer (col. 22, lines 8-12) and

an operation history information transmitting device configured to transmit the operation history request information to said mobile computer (col. 22, lines 13-15).

Although the conflicting claims are not identical, they are not patentably distinct from each other because they essentially reciting the same limitations.

Application/Control Number: 10/767,351

Art Unit: 2625

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allen H. Nguyen whose telephone number is 571-270-1229. The examiner can normally be reached on M-F from 9:00 AM-6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, King Poon can be reached on (571)-272-7440. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
